

This screen shot is of a very simple grade book. The course has only one user and the course has just the five assignments. Assignment 3, 4, and 5 are marked both as hidden and as extra credit. Both the category total and the course total reflect that and everything is fine in this view. You can see the aggregation strategy for both the category and the course are set to 'sum'.

Assignments							
First name / Last name	Assignment 1: 25 points	Assignment 2: 25 points	Assignment 3: 25 points	Assignment 4: 25 points	Assignment 5: 25 points	Category total	Course total
Range	0.00-25.00	0.00-25.00	0.00-25.00	0.00-25.00	0.00-25.00	0.00-50.00	0.00-50.00
Neil Streeter	25.00	25.00	-	-	-	50.00	50.00
Overall average	25.00	25.00	-	-	-	50.00	50.00

This screen shot is of the user report when viewed by the instructor. Again, everything appears fine. The hidden assignments are grayed out to indicate that they are hidden and the total points and percentage is calculated correctly.

Σ Course total	The Gradebook Challenge	50.00	100.00 %	

This screen shot is the user report when the STUDENT has logged in. You will notice that only the assignments that are 'visible' are showing – but – **the point totals are not correct**. The 'grade' column should be 50 for both the category total and the course total and the percentage should be 100% for every item and total.
