

The officeskill questiontype plugin

1.1 Installation

This installation manual describes how to install the officeskill questiontype plugin to an existing Moodle installation under Linux. It has been verified that the plugin works with versions of 1.8.1 and 1.9.2, but it may also work with other versions of Moodle. This manual assumes some basic knowledge of Moodle. The plugin is divided into the following two files:

Moodle-officeskill.zip. This is a zip file containing the files of the plugin.

The question type plugin needs to be installed in the question/type directory inside the root directory of Moodle. You simply need to unzip moodle-officeskill.zip. The following commands can be used to do this, assuming Moodle is installed in /var/www/moodle:

```
mv ./officeskill /var/www/moodle/question/type
```

When you login to Moodle as administrator and go to 'notifications' you should see a message indicating that a new plugin has been installed and that some changes were made to the database.

No warnings - Scroll to the continue button

officeskill plugin needs upgrading

(mysql): SHOW TABLES

(mysql): CREATE TABLE mdl_question_officeskill (id BIGINT(10) unsigned NOT NULL auto_increment, question BIGINT(10) unsigned NOT NULL DEFAULT 0, extra_document_penalty BIGINT(10) unsigned NOT NULL DEFAULT 0, type SMALLINT(4) NOT NULL, maxbytes BIGINT(10) NOT NULL, show_defaults TINYINT(1) NOT NULL DEFAULT 0, CONSTRAINT PRIMARY KEY (id))

Success

(mysql): ALTER TABLE mdl_question_officeskill COMMENT='Options for officeskill questions'

Success

(mysql): CREATE INDEX mdl_quesoff_que_ix ON mdl_question_officeskill (question)

Success

officeskill tables have been set up correctly

Installation successful

If you do not see such a message, please make sure you have unzipped the files into the correct folder and that the name of the plugin folder is called "officeskill".

1.2 Uninstallation

To completely remove the plugin:

1. Remove all officeskill questions from the questionbank. For instructions on how to do this, visit: http://docs.moodle.org/en/Question_bank.
2. Next you need to remove the officeskill table from the database. If you use phpMyAdmin to manage your database, you should do the following. On the left side of the screen select your Moodle database. Scroll to the mdl_question_officeskill table and click on the delete-icon next to it (see the image below). Then confirm the action.

<input type="checkbox"/>	mdl_question_multianswer							0	MyISAM
<input type="checkbox"/>	mdl_question_multichoice							87	MyISAM
<input type="checkbox"/>	mdl_question_numerical							0	MyISAM
<input type="checkbox"/>	mdl_question_numerical_units							0	MyISAM
<input type="checkbox"/>	mdl_question_officeskill							0	MyISAM
<input type="checkbox"/>	mdl_question_randomsamatch							0	MyISAM
<input type="checkbox"/>	mdl_question_rqp							0	MyISAM

Delete the mdl_question_officeskill table

3. Remove the actual plugin directory (question/type/officeskill) inside the root directory of Moodle, otherwise Moodle will reinstall it next time you access the site administration.

```
rm -R /var/www/moodle/question/type/officeskill
```
