

### **Where can we vote for ForumNG in core?**

by [Amir Elion](#) - Saturday, 6 February 2010, 02:30 PM

Is there a place in the tracker to vote for ForumNG to be included in core instead of regular forum or at least alongside it?

Amir - AFAIK, there is nothing that would prevent them from being installed side-by-side. I have not looked at the various changes in functionality but would say that it may be best to create an issue in the tracker as improvements to the forum one feature at a time. In any case, the tracker is the best place to start and of course you may want to chat with Sam Marshall who is the current primary maintainer of the forumng plugin. Peace - Anthony

Anthony, I think the question is, should forumng complete replace the current Moodle forum in, say, Moodle 2.1.

(I think the answer is yes.)

It would be good to get a tracker issue going, so people who agree can start voting. I don't think there is one yet.

Tim - I went ahead and created [MDL-21538](#) so that those interested can watch, comment, and vote on the issue as appropriate. It would probably be good if someone raised this as a topic for discussion on Moodle.org (if it has not been done already in the forums and mention the issue number there as well) Peace - Anthony
