

## New Feature Request: Assignment Resubmission System

The following document contains a number of suggestions that would bring about the Assignment Resubmission System that is described in the Moodle Tracker. Please visit this link: <http://tracker.moodle.org/browse/MDL-36804> to provide feedback or alternative ideas.

### 1: Gradebook: Revert-to-draft vs. Grade

Currently, when grading an assignment, the marker has the option to “Revert to Draft” OR “Grade” but BOTH options should be available to the marker.

First name / Surname	Status	Grade	Edit	Last modified (submission)	File submissions	Submission
Student	Submitted for grading	<input type="text" value="2"/> / 7.00		Tuesday, 27 November 2012, 1:02 PM	test.png	> Comments
Kara Neveau	Submitted for grading	<input type="text" value="2"/> / 7.00		Tuesday, 27 November 2012, 1:02 PM	test.png	

Allow for the selection of BOTH "Revert to Draft" AND "Grade" instead of either/or.

GRADE  
~~REVERT TO DRAFT~~

Now that the "Revert to Draft" function has been moved, this icon can be used to execute the "Grade" option, which opens the submission in full view mode (dropdown menu is no longer needed)

Grade

/ 7.00  
 Revert to Draft

/ 7.00  
 Revert to Draft

#### Rationale:

- A student is only allowed to resubmit an assignment when her submission is “Reverted to draft”. Yet, when an assignment is reverted to draft without any grade or feedback, the student does not have the information needed to improve his/her work.
- Combining these 2 functions make grading quicker and allow for the creation of a richer resubmission history

## 2. Assignment Settings: Grade-to-pass and Conditional Revert-to-draft

The image shows a screenshot of assignment settings in a learning management system. A red callout box with the text "add these features" has two arrows pointing to the "Grade to pass" dropdown and the "Automatically 'revert to draft' if grade-to-pass is not met" checkbox in the "Grade" section.

**Feedback settings**

Feedback files

**Grade**

Grade

Grading method

Grade category

Grade to pass

Automatically "revert to draft" if grade-to-pass is not met

**Common module settings**

Group mode

### Rationale:

- Quicker grading. Since the revert-to-draft setting is automatically set, the marker only needs to assign a grade to the assignment.
- Grade-to-pass setting is currently only accessible when editing assignment setting via the gradebook, which makes this important setting difficult to regulate, especially in courses with numerous assignments. Having this feature there allows for quick access.
- Conditional Revert-to-draft feature allows teachers to strike a happy medium by allowing students to successfully complete an assignment, without the risk of endless resubmissions.

### 3. Assignment (student View): Showing the submission history

(assignment content is shown here)

**Submission status**

Submission status	Draft (not submitted)
Grading status	Not graded
