Attempt Settings

Attempts reopened Manually
Maximum Attempts 2
Attempt Number 1
Allow another attempt No

Notify Students Save Changes Reset

Removed as shouldn't notify until final grade is recorded

(1) Not Graded status amended to indicate number of grades that need to be recorded against this attempt

(2) Grade indicator / form shows which grading record this is. In this case the 1st grade is being recorded against this attempt (attempt 1)

(3) Allow another attempts is disabled here as a new attempt can only be granted if the moderator decides the grades awarded do indicate that the work isn't good enough.

(3) Allow another attempts is disabled here as a new attempt can only be granted if the moderator decides the grades awarded do indicate that the work isn't good enough.

At this point 2 gradings have been made but there is no "final" grade. If either of the graders want to come back and change their grading then the assignment grading view would display **their** record. (This also sort of precludes the same user marking an attempted the required number of times).

Moderator View

Once the required (2 in this case), a moderator can view the attempt. This would also appear if the moderator were to go to grade the attempt.

(1) Grading status indicates the required number of gradings have been recorded against this attempt

(2) Each grading record is displayed to the moderator. The (i) info icon allows the moderator to drill down to more details

(3) Pop up display of the details of the grading record. This can be made full screen by the icon in the top right

(4) Send the feedback comments to the grading form, or send the selected text from the popup's grading record to the forms' comments area.

(5) Since the required number of gradings have been recorded / the user is a moderator, the decision to permit another attempt is granted.
