Upload mode = Create or update / update only

▼ Import options

Upload mode ?	<input type="text" value="Create new courses, or update existing ones"/>
Update mode ?	<input type="text" value="No changes"/>
Allow deletes ?	<input type="text" value="No"/>
Allow renames ?	<input type="text" value="No"/>
Allow resets ?	<input type="text" value="No"/>

▼ Course process

Restore from this file after upload ?	<div>Choose a file...</div> <div> You can drag and drop files here to add them.</div>
Restore from this course after upload ?	<input type="text"/>
Reset course after upload ?	<input type="text" value="No"/>

Note 'Reset course after upload' is shown but disabled, unless 'Allow resets' is enabled as well, at which point it is enabled.

I believe this makes sense, as 'Reset course after upload' is completely irrelevant when only creating new courses. If, however, you are updating existing courses then this is an option that you might want to use, so having it visible, but disabled, is a hint that it is possible, but prevented by other settings on the form.
