TYPO3 Repository SSO Plugin

Screens
TYPO3 Installation – add new moodle connection
TYPO3 Installation – Create a Moodle instance record

Edit LMS3 Sitemap - Moodle instance "yourdomain.de" on page "Moodle Instance"

- **Hostname**: `yourdomain.de`
- **Encryption hash key**: `Ki06-88235`
- **URL**: `https://yourdomain.de/mod/typerepo/save.php`

Which part of the TYPO3 page tree Moodle Editor will be allowed to embed.

Moodle Installation URL
Hash Key
URL to save TYPO3 Ressource
TYPO3 Installation – Create a Moodle sitemap

The sitemap is shown while adding a TYPO3 activity to Moodle.

In TYPO3 the sitemap needs to know to which Moodle instance to connect and where the record with the credentials is stored.
